

The FCC should not implement any proposal that would lessen In.'s Telephone Privacy Law. I am a retired person and am doing Carving work to help with the income. I can't be getting up to answer a phone 6 or 7 times a day and do my work. My husband has a bad back and can't get to the phone easy. It has made our life much better without the ringing of the phone. We also go to bed early now because the phone doesn't ring past 9 pm as it did before.
